SUMMARY

Front-End Developer with 1.5+ years of experience, building on 6 months of self-taught learning. Skilled in creating responsive, mobile-friendly, and accessible websites using HTML, CSS, JavaScript, and Figma. Focused on delivering user-centric designs, improving performance, and optimizing for accessibility and SEO.

PROFESSIONAL EXPERIENCE

Web Programming

2022 – 2023

- Optimized and restructured HTML and CSS for multilingual websites supporting over 15 languages, ensuring alignment with Figma designs and full CMS customization.
- Enhanced mobile-friendliness, accessibility, and SEO standards, leading to improved user engagement and better rankings.
- Implemented modern animations and transitions in a performant way, creating smoother user interactions and an engaging experience.
- Applied performance optimizations to reduce page load times, significantly enhancing the overall user experience.

Web Programming

2023 – 2024

- Developed 4+ multilingual e-commerce websites, driving sales for 15+ companies, with a focus on mobile-friendly, responsive, and accessible designs.
- Improved page load times and overall website performance through optimized coding practices.
- Built and deployed accessible CMS components such as grids, hero sections, and product sliders, enhancing UX across multiple platforms.
- Implemented a plugin for product detail pages, displaying color options visually rather than textually, adopted by 30+ companies.
- Designed SEO-compliant blogs using Google Schema standards, adopted by 25+ clients.
- Created a Question & Answer plugin integrated into product detail tabs, enhancing user engagement and increasing sales, adopted by 7+ companies.
